Subject: Keep Walmart out of banking

Dear Ms Bair,

Walmart has proven time and time again that they are willing to sacrifice worker and community to satisfy the bottom line. They have already infringed upon and dominated the local retail economy in thousands of small communities.....I don't see why we need to let them do that in banking too. Why concentrate so much financial and commercial banking power into one corporation? Allowing Walmart into local banking could seriously endanger local economies and drive small banks out of business.....then who are local business people supposed to turn to for financing? Their competition? Yeah right!

Please don't let Walmart do this. They are not a trustworthy corporation.

Thanks,
Michancy Schultz
